RECYCLED ART LANTERNS

EPIC SLEEPOVER EXTRAVAGANZA

Create a beautiful stained-glass lantern using recycled materials from your house! Lanterns have been used to light up spaces from people around the world since ancient times. Use your lantern to light up your space, as a nightlight, or whatever else you want!

1

Gather Supplies:

- Clear Plastic Jar
- Plastic or Paper Bowl
- Tissue Paper (various colors)
- Tea Light
- String
- Scissors
- Tempera Paint (or other)
- Paintbrush
- Parchment Paper
- Glue Stick
- Candle
- Straight Edge Cutter / Screwdriver

2

Paint your jar lid and bowl in whatever color you choose, then let dry.

3

Make 2 holes at the base of your jar and 1 hole in the center of your bowl. To do this, you will need the help of an adult! Heat up the point of your cutter or screwdriver in the flame of a candle, insert it into the plastic, and turn it in a circular motion to create your holes.

4

Insert a piece of string through the inside of the jar and out through the holes at the bottom, then place your bowl upside down on the base of the jar and insert the strings through the hole in the bowl so you can hang your lantern. Secure it with a knot.

5

Cut out different shapes and figures from your tissue paper in different colors.

6

Glue each piece onto the jar and overlap the shapes to create more dimension.

7

Cut a piece of parchment paper and roll it into a cylinder shape to fit inside your jar.

8

Place the parchment paper inside your jar.

9

Turn on your tea light and place it on the lid, then close the jar.

10

Now see how your recycled art lantern lights up your home!
